

DAA Industrial (IMS100)

DESCRIPTION

DDA Industrial is also known as Denatured Absolute Alcohol and Industrial Methylated Spirits 100 (MS100). 100% denatured industrial ethanol widely used in the surface coatings, printing ink and foundry industries. **DAA Industrial** does not require an Australian Taxation Office (ATO) license to transact.

FEATURES

A clear, colourless liquid miscible in water and hydrocarbon solvents.

A product for use in industrial cleaning formulations, coating reducer formulations and laboratory reagents.

DAA Industrial is conventionally used in many paint thinner formulations, flexographic solvents and dye based inks.

Also commonly used in steel foundries as a thinner for foundry paint systems.

Versatility – **DAA Industrial** is readily available and inexpensive. It is often a suitable alternative to Isopropyl Alcohol where solubility is not critical or can be assisted by other formula components.

As **DAA Industrial** is derived from fermentation ethanol, the risks associated with human contact are minimised.

PACKAGING

DAA Industrial is available in bulk, IBCs (1500 litre bulk containers), drums and 20 litre containers.

SAFETY

Please consult the MSDS on **DAA Industrial (Ethyl Alcohol)** before use.

The information and recommendations contained herein are based on data believed to be correct at this time. However, no guarantee of any kind, expressed or implied is made with respect to the information contained herein.

Typical Characteristics

Alcohol Strength % v/v	99.8 min
Boiling Point.....	78°C
Flash Point.....	12.7°C
Specific Gravity.....	0.79
