ALCOHOLS (NON-ETHANOL)

Isopropyl Alcohol 100% (IPA)

DESCRIPTION

Isopropyl Alcohol (also known a Isopropanol) is a non-potable alcohol, suitable for industrial cleaning and formulating where a waterless environment is desired. It is primarily used in the printing industry as a component in fountain solutions.

FEATURES

A clear, colourless liquid miscible in water and hydrocarbon solvents.

Used in industrial cleaning formulations, coatings reducer formulations and laboratory reagents.

Versatility – **Isopropyl Alcohol** is readily available and inexpensive. It is often a suitable alternative to 100% ethanol where increased solubility is required. **Isopropyl Alcohol** is often used in human contact situations.

PACKAGING

Isopropyl Alcohol is available in IBCs (1500 litre bulk containers), drums and 20 litre containers.

SAFETY

Please consult the MSDS on **Isopropyl Alcohol** before use.

The information and recommendations contained herein are based on data believed to be correct at this time. However, no guarantee of any kind, expressed or implied is made with respect to the information contained herein.

Typical Characteristics

Odour................characteristic, non-residual

Specific Gravity...................................0.786

Flash Point..12ºC

Boiling Point..82ºC

Evaporation Rate [n-BuAc=100]............250

Viscosity @ 25 o C ....2.08 mPa.s
