

## METHYLENE CHLORIDE

# Methylene Chloride

### DESCRIPTION

**Methylene Chloride** is a non-flammable chlorinated solvent with varying uses. It is most commonly used in paint stripper formulations.

### FEATURES

**Methylene Chloride** is used in areas where a high degree of solvency of organic matter is required.

It is a highly effective solvent of interior and exterior coatings and combines well with other organic solvents.

**Solvency** – **Methylene Chloride** is highly effective on complex resin systems and evaporates quickly.

### PACKAGING

**Methylene Chloride** is available in drums.

### SAFETY

Please consult the MSDS on **Methylene Chloride** before use.

The information and recommendations contained herein are based on data believed to be correct at this time. However, no guarantee of any kind, expressed or implied is made with respect to the information contained herein.

### Typical Characteristics

Specific Gravity.....	1.326 min
Boiling Point.....	40.1°C
Acidity (as HCl).....	10 ppm max
Non-Volatile Residue .....	10 ppm max
