

## SURFACTANTS & DETERGENT ADDITIVES

# STPP (Sodium Tripolyphosphate)

### DESCRIPTION

STPP powder used in the chemical manufacturing, petroleum, cement and water treatment industries.

### FEATURES

Used in liquid detergents, cleaners and in powder laundry detergents as a builder.

Used in water softening formulations to assist in scale and corrosion control.

Used in cement slurries as a deflocculating agent to increase pumpability of slurries and in ceramics as a dispersant for clays.

Dissolves readily in hard and soft water.

STPP is a stable powder and is non-regulated.

### PACKAGING

STPP is available in 25kg bags.

### SAFETY

Please consult the MSDS on **STPP** before use.

The information and recommendations contained herein are based on data believed to be correct at this time. However, no guarantee of any kind, expressed or implied is made with respect to the information contained herein.

### Typical Characteristics

Appearance .....	white powder
Solubility In Water @ 25°C.....	150 g/L
pH (10% solution).....	9.9
Formula Weight.....	367.9
Melting Point .....	622°C
